

Geography: Section 2 - Homework

Fieldwork: Air Pollution around our School

Read the diagram below to remind yourself of what the main sources of pollution are.

Activity One

As you walk home today from school take time to observe safely your surroundings. As you walk take a mental note of any possible sources of pollution you can see.

Note down your observations in the space below. This could be in a sentence, as key words or as pictures. You can also do a mixture of all three.

Activity Two

1. Based on your walk home, what are the two main sources of pollution?

2. Where you surprised by what you observed? Give one reason for your answer.

3. What do you think you and your family, local businesses and the local authority could do to reduce the sources of pollution?
