## Traffic Count Record Sheet

Pupil Name: $\qquad$ Location: $\qquad$ Date: $\qquad$ Time: $\qquad$
Over a 20 minute period you have to count the number of vehicles that pass you on the road. Before you begin, predict how many of each vehicle you think you will count. Under each heading use a tally mark for each vehicle that passes e.g. if 3 cars pass you, you should have 3 tally marks under that heading.

|  | Cars | Lorries | Buses | Vans | Bicycle | Scooter/Skateboard | Idling Vehicles |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |
| Prediction |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |

1. What was the most popular vehicle? $\qquad$
2. What was the least popular vehicle? $\qquad$
3. How many vehicles passed you in total? $\qquad$
4. Are the results what you expected? Give two reasons for your answer. $\qquad$
